LISTENING CIRCLE

Listening in a structured, moderated circle, taking turns speaking and reflecting what is spoken, to the satisfaction of the speaker, is both challenging & exciting.

Intelligence is built by listening to understand.

Sharing our story, our experience, is both healing and fun.

Trust is built when we hold space for deep listening.

Experiences of hearing and being heard are the foundation of pro-social behavior, moral development and healthy democracy.

Nothing short of a miracle is empathic understanding—for creating wholistic systems within us and our community.
